

BILLY EDWARD PPE Catalog

About Billy Edward Consulting

Established in 2007 and headquartered in Houston, Texas, Billy Edward Consulting, Inc. is a privately held, minority & veteran-owned company that takes a unique approach to inventory management and industrial supply. We incorporate next generation artificial intelligence and machine learning (AIML) technology, top name-brands in industrial procurement, cutting-edge technical innovation, and veteran employment to leverage the best possible outcomes in all that we do.

Innovation

JYRSA is our primary near-shored Personal Protective Equipment (PPE) manufacturer. The hand-picked partner employs proprietary green manufacturing techniques to produce select lines of the highest quality PPE. Billy Edward PPE products are augmented with the highest quality next generation vending solutions.

Manpower

In those cases where there is no substitute for an employee, we leverage veteran employment to ensure the best outcomes possible. Arguably the most underutilized workforce solution in our society is the U.S. veteran. Highly trained and disciplined, reskilling of our veteran population represents the shortest distance between many of our clients' needs and a highly vetted, extremely viable employment solution. Billy Edward Consulting understands the Military Occupational Specialties (MOS) our forces identify with, where to find them, and how to transition them in support of your workforce requirements.
